We offer Global Solutions for Quality Cultivation

Synqo stands out as a prestigious supplier of superior-grade cultivation resources. Our distribution range spans all of Europe, providing an outstanding assortment of products from esteemed brands like Dutch Lighting Innovations, Epap, Philips, Supreme, New Millenium Nutrients, Gen200, Rock Resinator, Plant Success, van Gogh's, Dutch Masters, and many others.

We practice a distinct philosophy – only the elite products that have demonstrated their ability to encourage growth are chosen and distributed. At Synqo, our commitment to quality is uncompromised. We endeavor to deliver comprehensive, global solutions for superior cultivation.

E-Pap

Morpho 3.0

“Better than the rest.
Just like you.”

3.0 $\mu\text{mol} / \text{joule}$

E-Pap Morpho 600W LED

State of the art design provides an incredible efficacy of **3.0 $\mu\text{mol}/\text{J}$ at only 600W.**

The fixture generates power equivalent to 1000W HPS. It contains 2 different dimming systems: a knob dimmer which gives you 4 different levels of dimming range - 30%, 50%, 75% and 100%.

Lightweight and foldable design

Our innovative design provides convenience as it is designed to be foldable and lightweight at the same time.

Great flexibility and easy to use

The input voltage range of the Morpho 600W ranges from 208 - 400V. This provides a greater flexibility: the fixture is not affected by voltage restrictions and can operate in every situation.

- LED Output: **1800 $\mu\text{mol}/\text{s}$**
- IP Classification: **IP65, Class I** (needs protected ground)
- Beam Angle: **120°**
- Product Dimensions: **1105 x 1115 x 65 mm**
- LED Power: **600W**
- Product Weight: **10 kg**
- Voltage Range: **208V - 400V**
- Certifications: **CE, IP65, Class I**
- LED Efficiency: **3.0 $\mu\text{mol} / \text{joule}$**
- Country of origin:
Design: **the Netherlands**
Manufactured: **P.R.C.**
- Dimming: **25%-50%-75%-100%**
With controller: **30-100%**
- Warranty: **5 Years**

SUPREME

THE TRAILBLAZER IN HORTICULTURE PRODUCTS.

SUPREME OPTIC-PRO

- 1000W 240V DIMMABLE HPS FIXTURE
- DIMMABLE WITH CONTROLLER

Supreme OPTIC Series

1000W 240 DIMMABLE HPS FIXTURE

The Supreme Optic Series - a robust 1000W light fixture inclusive of a high-intensity bulb. A quintessential equipment for professional grower, this fixture promises peak photosynthesis through superior illumination. It guarantees exceptional yield in both the vegetative and flowering stages. The Supreme Optic Series is not only energy-efficient but also compact, durable and designed with sophisticated growing operations in mind.

TECHNICAL SPECIFICATION

Input voltage : 240V +/- 10%
 Rated power : 1045 Watt
 Dimming steps: 600-750-825-1000-1150W
 Frequency : 50/60 Hz
 Current : 4,4A@240V/1000W / pf >0,98

Electronic driver

- High efficiency >95%
- Adjustable power
- Manual soft dimming
- Surge protection

DLI UV 150W DE

We challenge the *Status Quo!*

DLI

Dutch Lighting
Innovations

Only 4 hours
a day!

1 UV : 4 fixtures
(HPS or LED)

More
terpenes &

Cannabinoids

Healthier
plants &

Pest-control

DLI UV 150W DE

One of a kind DLI exclusive

Dutch Lighting Innovations is the only grow light manufacturer that develops and builds UV-light fixtures able to recreate all the UV-A and UV-B advantages inside. All advantages of sunlight, in a controlled environment.

The fixture can be used in combination with both HPS and LED and does not serve as a grow light but as a supplement. The full spectrum UV source stimulates plant health, reduces pests and increases valuable terpenes and other compounds. The fixture works best when used for 2-4 hours a day.

IG: @dutch_lighting_innovations

- **More terpenes and cannabinoids**

- **Healthier plants:** UV exposure at the right dose manifests in healthier, more resilient plants. Stimulation with UV light increases leaf and cell wall thickness and makes plants less susceptible to bugs and mould.

- **More vigorous plant grow**

- **Supplement to HPS and/or LED:** The fixture can be used in combination with both HPS and/or LED and serves as a supplement to the standard grow light. The wide, UV resistance reflector makes the fixture suitable for multiple lay-outs. UV lights work best, when they are on for at least 2 to 4 hours a day during the lighting cycle.

Spektra Master

Full Spectrum 720W LED

Spektra master 720W

FULL SPECTRUM

Spektra Master LED 720W is a LED fixture with 6 light bars. The device is intended for use in greenhouses or air-conditioned grow room with PPFD of 2016 micromole/s/m², providing the best light penetration to your plants. Spektra Master offers excellent full spectrum for all phases of cultivation. The natural looking light emitted by the Spektra Master 720W LED makes it easy to precisely monitor the health of your plants.

Warranty: **3 years**

TECHNICAL SPECIFICATION

Spectrum: **Full spectrum**
 PPF: **2016 mmol/s**
 Input power: **720W**
 Input voltage: **AC220-277V**
 Efficiency: **2.8 mmol/J**
 Dimensions/Weight: **119.5x 110.8 cm 6.7 cm high 12.55 KG**
 Mounting height: **15 cm above the canopy**
 Cooling: **passive cooling: our solid and robust construction has no fan inside.**
 Regulation: **manual 0-25-40-60-80-100%**
 external control 0-10V
 Light distribution: **120 degrees**
 Led diodes: **2328 Sanan chips.**
 Service life: **L90: > 54,000 hours**
 Certification: **IP66, CE**

Platinum King LED 680W

Full Spectrum - Efficacy: 2.8 $\mu\text{mol}/\text{J}$

A system with the latest LED technology and the ability to connect to any 600 W electronic ballast.

A flexible equipment as it does not have the ballast or the integrated driver, so you can mount it on the side or on the wall, with the Platinum electronic ballast even at a distance of up to 10 meters, so that the heat given off by the ballast does not pass to the growing environment, it can be controlled without accessing the room.

Platinum King glizzy LED 720W

Full Spectrum - Efficacy: 2.8 $\mu\text{mol}/\text{J}$

The Platinum King Glizzy 2.8 720W system, is a linear multi-light bar fixture that produces 2016 $\mu\text{mol}/\text{s}$.

The Glizzy 2.8 720W system is made of Osram deep red LEDs and Sanan Chip, which generates a full spectrum light source ideal for vegetative and flowering cycles. For other periods its light can be dimmed without losing efficiency. The Platinum King Glizzy 2.8 720W LED system can also be controlled with the Platinum Smart Controller.

PLATINUM HORTICULTURE
INTERNATIONAL

Comet 1000W D.E.

- Master Controller connection
- Improved housing for better ventilation
- Repositioned connections and ports for better weight distribution and stable installation

Platinum Comet 1000W D.E. 1000W 240 DIMMABLE HPS FIXTURE

The Platinum Comet fixtures are enhanced and adapted models to be controlled by the Platinum Master Controller, giving you complete control of your lighting. This fixtures power can be increased to 1200 watts.

Platinum Comet is the professional standard for efficient lighting in a climate-controlled room. They operate with the standard 240V that power the high-voltage electronic lamps used in horticulture, which are superior in spectrum, light power, and maintenance over time.

IG: @platinumhorticulture.europe

TECHNICAL SPECIFICATION

- Connection for Master Controller
- Enhanced casing for better ventilation
- Repositioned connections and ports for better weight distribution and stable installation
- Suitable for high-frequency electronic horticultural lamps of 400V.
- Replaceable HR96 reflector, 96% efficiency for optimal performance
- Controllable output: dim or increase its light power to adjust to different circumstances or growth stages
- "Soft Dim" function, which gradually changes the output power when it is changed, eliminating stress on the lamp
- No electromagnetic interference problems due to the integrated design

Platinum Supernova 1000W D.E. 1000W 240V HPS fixture

This fixture can be upgraded to 1150 watts. Platinum Supernova is the professional standard for efficient air-conditioned room lighting. They operate on the standard 240 V power supply for electronic high voltage horticultural lamps, which are superior in spectrum, light output and light maintenance over time.

Can be controlled by the Platinum Master Controller.

Platinum Supernova 1000W fixture D.E. C8DMH5

HPS FIXTURES

Platinum Horticulture
1 pcs/box

Platinum Venus 1000W D.E., LEC, CMH and HPS lamps

This fixture is special because the ballast is suitable for HPS, CMH / LEC D.E. bulbs. The Venus is a double-ended, high intensity horticultural lighting system with ceramic ferrules. It combines a closed double-ended reflector with a ballast with power variation. In addition, it can also be used with LEC bulbs.

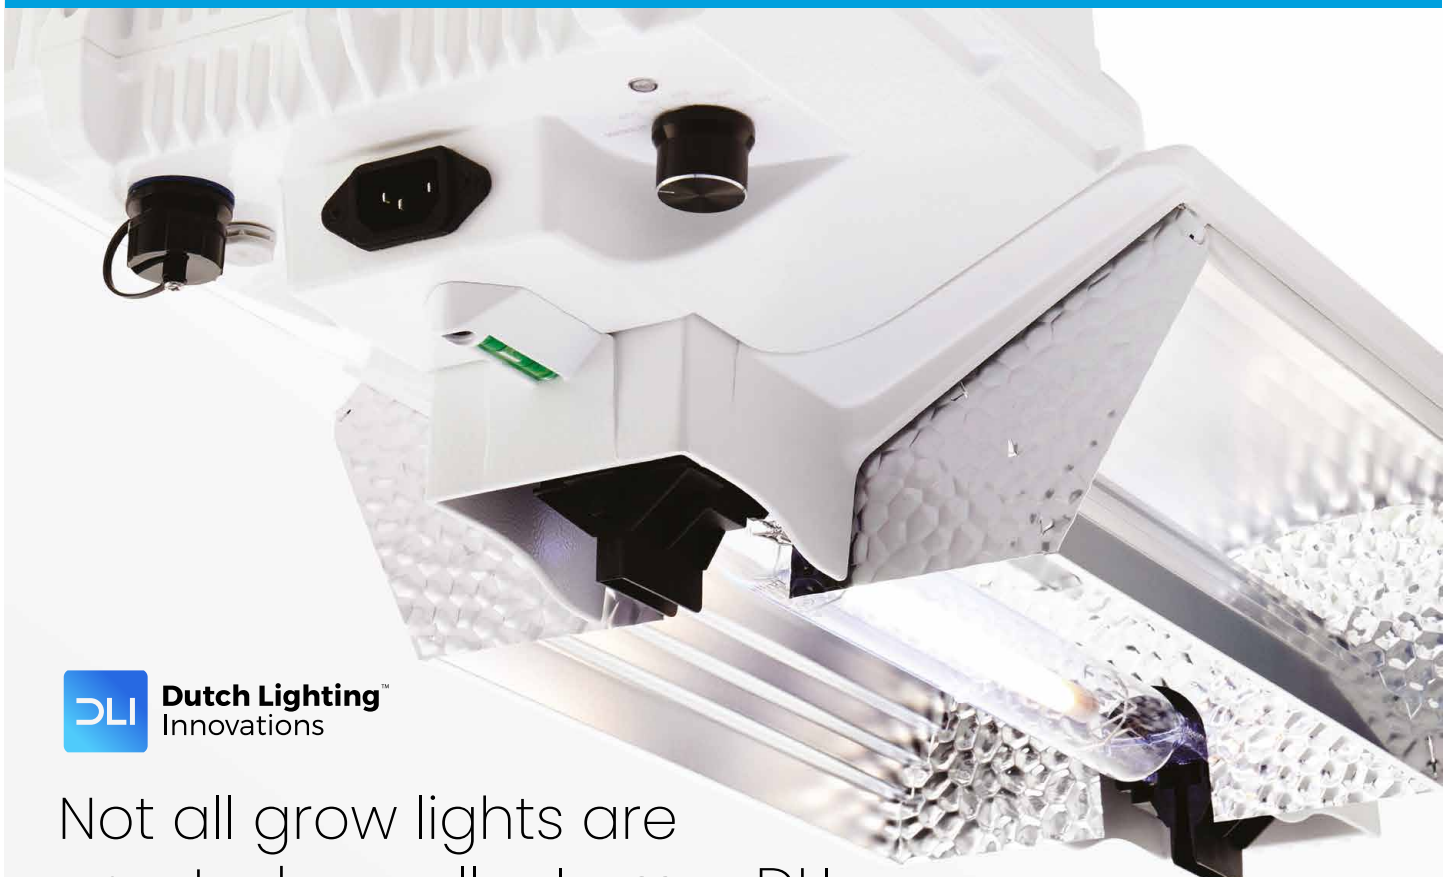

This unit can dim from 600 W to 1150 W by simply adjusting the dial on the ballast itself.

Can be controlled by the Platinum Master Controller.

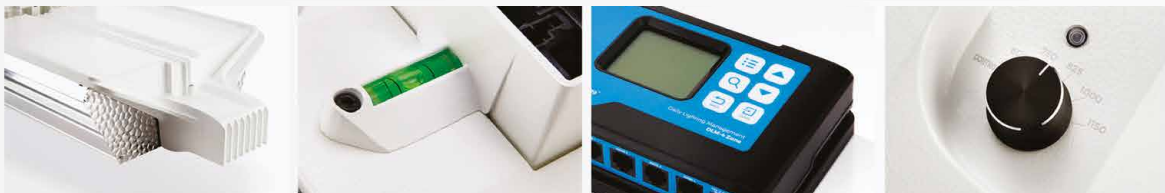

Platinum Venus 1000W fixture C8DMH110

HPS FIXTURES

Not all grow lights are created equally... I am a DLI.
I am #FLOWERSONLY

JOULE-Series 1000W DE

Time for Improvement

For Decades growers have settled for lighting options that are not 100% tailored for their use and crop. Grow light manufacturers are always trying to appease the mass populations of growers, rather than honing in on exactly what they need for optimal performance, yields, and most important quality. The engineering principles behind the DLI Open Reflector are a culmination of over a decade of research and development. The team works with a ranging group of some of the best horticulturists around the globe; each who specialise in plant and varietal specific production processes for the ornamental, and commercial flower market. Dutch Lighting Innovations consistency, reliability, and quality unparalleled in the niche world of growing the best flowers and plants on Earth!

- **Extra Low-Profile Housing** (Ideal for low ceilings)
- **Improved Heatsink** (Increased Driver Efficiency)
- **LED Indicator** (Status & Error Diagnostics)
- **Dim Switch Dial** (Dimmable to 600W – 1150W)
- **IP65 Controller Connection** (Plug & Play / DLM-Series)
- **Gore-Tex Plug** (Ventilation Plug)
- **Driver efficiency > 95%.**
- **Built in Spirit Level** (Achieve Perfectly Even Light Spread)
- **Replaceable reflector and lamp**
- **Improved reflector**

Compact and foldable design

Due to the compact and foldable design, the transport and installation of a lighting fixture has never been simpler. DLI presents the DLI DIODE Series Multilayer, the fixture that sets the standard for easy cultivation. We have created a practical and simple fixture without compromising our tried and tested quality.

- Simple and foldable design
- Always level, Plug and Play
- Compatible with all existing DLI systems
- High efficiency and output
- Wide voltage input

- **Wide Voltage** (Range 208-400 VAC 50/60Hz)
- **Optimized Thermal Performance** (Runs diodes cooler for improved performance)
- **Foldable** (Easy for transportation and installation)
- **2.9 uMol/J** (Very efficient performance!)
- **Wieland quick connect** (Easy drop in replacement without need for rewiring)
- **Integrated digital control** (Nothing more to purchase or mount, true plug and play!)
- **Easy mounting** (Wire hanger or cable compatible)

Lighting Kits 600W

Kit:
- Digital Dimmable Ballast
- Platinum Lamp 600W

Kit:
- Magnetic Ballast Compact
- Platinum Lamp 600W

Electronic Ballast (00008) Dimmable 250-400-600-660 watt Electronic Ballast is a microprocessor controlled ballast that maintains lamp lumens longer than traditional ballasts.

Platinum 600 W lamp (00016) The lamp Platinum 600 w, is a mixed lamp with E40 thread, designed for an optimal development of the plants during their growth and bloom. It is a specific lamp, which offers the right spectrum to get the most out of your plants. It generates orange light, with a spectrum of bluish tones covering all the needs of your crops.

Choose your Reflector:

SUPREME

READY TO TAKE YOUR CULTIVATION TO THE NEXT LEVEL?

Supreme gives you the perfect base for your cultivation!

Supreme Coco Plugs make it easy to start propagation and transplant small plants after maturity. The seeds germinate well in the porous material, resulting in good root development. It also retains moisture longer and you don't have to carry around heavy bags of dirt.

Supreme Coco Plugs are also great for rooting cuttings.

We offer Global Solutions for Quality Cultivation

RHP POTTING SOIL TRADE REGULATION

Why is RHP Certification so important for plants growing on substrates?

In the modern world of gardening, it is becoming increasingly important to ensure that substrates for horticulture are certified for safety and quality. RHP certification helps to guarantee the safety of plants that are grown in substrates such as peat, coco coir or soil.

RHP stands for “Regeling HandelsPotgronden” (Potting Soil Trade Regulation). The Potting Soil Trade Regulation certifies substrates with the RHP certification. The RHP certification guarantees that the substrate meets the relevant quality requirements for, for example, water absorption, air content, pH and nutrients. It also provides more certainty that the substrate is clean and pure, and can be used safely without risks to the crop. The raw materials of RHP-certified substrates are examined beforehand for weed seeds, etc. Stringent tests are also carried out for heavy metals and pathogens dangerous to plant and man. Producers also work with respect for the environment.

WINTER FROST

#finesseyourphenos

PROMOTE HEAVIER ESSENTIAL OIL CONTENT AND FLORAL MASS EXPANSION.

ACCENTUATES THE CHARACTERISTICS OF EACH PLANT GENOME. UNLOCK TRUE GENETIC POTENTIAL

COMPATIBLE WITH ALL OTHER PLANT FOOD SYSTEMS RECOMMENDED TO USE WITH RUBY FUL#\$% FOR BEST RESULTS.

Winter Frost

We're tricking the plant into thinking it will freeze, this makes the plant produce more essential oil production for a protective layer around its trichomes and divert all remaining energy to flower and bud production.

Unlike other products on the market that homogenize your plants giving them all a generic taste and flavor, Winter Frost will individualize your plant strains and unlock the genetic potential, expressing the oil and color profiles of your phenotype.

- **Promote heavier essential oil content** and floral mass, expansion during the final 7 to 10 days prior to flushing before harvest.
- **Accentuates the characteristics of each plant genome.** Unlock true genetic potential and standardize the difference in each of your favorite crops.
- **Is compatible with other plant food systems,** but must be used in conjunction with a calcium and magnesium source.

Gen200 Control

Is a bio-mix of natural micro-elements supplemented with 100% bio-available ortho silicic acid.

GEN200 Control is a proprietary biomix of natural micro-elements supplemented with ortho silicic acid. GEN200 Control ensures the regulation of the growth of the plants and their natural defence system. This ensures that the plants are more resistant against diseases and distresses such as extreme heat and cold. Your plants will root faster, develop stronger stems and leaves, which will result in firmer plants and bigger yields. GEN200 Control can be used on all kinds of soil and with all kinds of nutrition.

Great White

Premium Mycorrhizae

THE benchmark
in the American market
when it comes to mycorrhizae.

Great White Premium Mycorrhizae with Beneficial Bacteria and Trichoderma

The endo and ecto mycorrhiza, beneficial bacteria and trichoderma build a microbial system in and on plant roots which enhances water and nutrient uptake. Great White can be used in hydroponics, field agriculture or home gardening. It is best used in the early stages of growth. Users should look for vibrant and vigorous plants. Great White is used by professional and home growers for its quality, consistency and proven results.

IG: @Greatwhitemyco

- **Seeds:** Lightly dust with Great White.
- **Cuttings:** Dip cutting into rooting gel/solution then lightly dip directly into Great White powder. Mix into pre-soak/fertilizer solution at a rate of 1 scoop (1tsp or 5 grams) per 8 liters of water.
- **Transplanting:** Lightly dust planting hole and place plant directly on top.
- **Soil, Coco and Topfeeding:** Apply at a rate of 1 scoop (1 tsp or 5 grams) per 8 liters of water.
- **Hydroponics:** Mix into reservoir with regular feeding at a rate of 1 scoop (1 tsp or 5 grams) per 40 liters of water. Hydroponic users may find settling or particles on bottom of reservoir and should not be concerned of product loss; it's normal for the carrying agent to settle.

MASTER MIRACLE C

stimulates your plants when in full bloom

VAN GOGH'S

COMPLETE FERTILIZERS

MADE IN AMSTERDAM

Master Miracle C

MASTER MIRACLE C stimulates your plants when in full bloom. During these phase, MASTER MIRACLE C provides all necessary nutrients. Pure and natural nutrients, such as trace elements, vitamins and acids ensure an explosive hardening of the blossom. Furthermore it enhances a higher resistance against fungi and bacterial diseases.

During flowering, plants consume huge amounts of energy. Energy which your plants green leaves only produce via photosynthesis. Your plant transfers carbon dioxide from light, oxygen, water and nutrients into necessary energy. A shortage on nutrients causes yellow leaves, which results in stressful situations and an incomplete flowering and harvest.

IG: @vangoghsamsterdam

REGULATION AND CONTROL

C8DMH76
54 pcs/box

Fan Controller Without Thermostat DM-1000

The DM-1000 Dutch Masters Fan Controller DM-1000 is a speed controller with 6 A internal fuse.

For speed regulation of fans and extractors. It regulates the fan motor speed of centrifugal and other fans. It should never lower the ventilation below 50 %.

If you need less ventilation, it is advisable to buy another fan. Turning down the power of an exhaust fan below 50% will damage the motor permanently.

Fan Controller DM-1000

C8DMH76

REGULATION AND CONTROL

C8DMH75
27 pcs/box

Fan Controller With Thermostat DM-1500

The DM-1500 Dutch Masters Fan Controller with Thermostat controls the speed of the fans based on the set temperature.

With this controller you can set a desired working temperature, then set the minimum working speeds and the DM-1500 takes care of maintaining the temperature in the greenhouse.

It withstands a maximum load of 6 Amps.

Fan Controller (Thermostat) DM-1500

C8DMH75

Temperature controller STC

C8DMH150
1 pcs/box

Electronic controller STC 8/16 AMP for precise room climate control.

MAIN FEATURES STC

Electronic controller STC for precise room climate control.

The STC Controller allows you to simply and automatically control the temperature of the grow room and keep the temperature constant, it has a LDR light sensor when the sensor detects that the lights go out it automatically goes into night mode that means that every hour the STC puts the fans at maximum for 5 minutes to remove excess humidity from the room.

There is no need to adjust each fan individually because the STC does it automatically to maintain the desired temperature.

- Fan speed adjustment with 2 levels
- LDR light probe
- Bandwidth (sensitivity adjustment)
- 1.5 meter main cable
- Five-year warranty

STC CONTROLLERS INCLUDE

- 5-meter NTC temperature sensor.
- 5 meter LRD light sensor.
- Spare fuse.

5m LDR

5 meter LDR (light sensor) included.

OCD DEO MAX

Odour Neutralising GEL

OCD DEO Max Odour Neutralising Gel

Keep every room fresh

Ideal for around the house. Eliminate all the odours from around the house by placing a tub of OCD DEO MAX Gel in the corner. We recommend using an Original gel downstairs and a Fresh Linen upstairs, giving you a sensational smell experience throughout your home.

Our OCD Lemon gel and our other gel fragrances come in 1 Litre, 4 Litres and 22 Litre tubs. So if you have a smelly washing basket, take a 1-litre tub. If Grandad ate too many beans, that would require a 4 Litre tub and if you have multiple teenagers, break out the 22 L OCD gel. The OCD lemon scent makes it smell great, and the OCD DEO MAX gets rid of the bad smells completely.

Why OCD gel?

The gel is a semi-solid, so you have the pleasure of being able to distribute the OCD gel into various containers. At the same time, also have the longevity of a solid like the OCD blocks. The fragrance is released evenly from the gel and combined with the DEO MAX, obliterates smells from that room. As soon as you lift the lid, you know you're in the presence of an OCD product, and depending on which size you buy (1 L, 4 L or 22 L) you'll have a fresh smell for weeks and months to come. In short, you use gel when you need options and who doesn't love options.

Pot base square – 25x 25 cm / 29x 29 cm

It can also be used to water the plants from the bottom, filling the tray of water where we will place the plants. This irrigation system is suitable as long as at the end of the day we remove the water that has not been drunk by the plant. If we leave the water for a long time, it can rot the roots.

*25x 25 cm for 11/14 L pots
29x 29 cm for 18/25 L pots*

Round Fabric Pot

- With handles

Round Fabric Pot Black

MAIN FEATURES

The Fabric Pot With Handles is a biodegradable plant pot, made from 100% recycled materials. Moreover, they are degradable when buried together with the plant they contain.

These fabric pots with handles are great for any type of plant, they are light and flexible, making them easy to transport and ship without taking up much space and with much less weight than plastic pots.

Round Fabric Pot

- With handles

Round Fabric Pot White

MAIN FEATURES

The Fabric Pot With Handles is a biodegradable plant pot, made from 100% recycled materials. Moreover, they are degradable when buried together with the plant they contain.

The material used in their manufacture is breathable, allowing the roots to obtain an extra amount of oxygen. This oxygen supply stimulates the formation of new roots and secondary roots throughout the pot. The cycle of "pruning" and "growing" new roots continues, creating abundant, healthy roots in the growing medium.

Leaf Trimmer Manual

Leaf Trimmer Automatic

The leaf trimmer manual, is a bowl type trimmer with stainless steel bottom and fully transparent top.

It comes with 1 straight blade for wet trimming and 1 crossed blade for dry trimming.

The transparent dome allows you to see the level of trimming. This trimmer allows to remove the leaves from the buds in a fast, easy and efficient way, saving effort and a lot of time to dry, cure and preserve the buds.

MADE WITH THE BEST MATERIALS

The leaf trimmer manual has been manufactured with high quality materials: medical grade stainless steel for all metal parts, heavy duty polycarbonate lid, food grade rubber for the seals and super quiet fingers.

Electric scissors

MAIN FEATURES

The manual Electric Shears quintuples the speed of manicuring and peeling with great precision, saving time and money. It has an oscillating blade that beats against two side blades that catch the leaves of the plants pruning them. It has a potentiometer that allows to regulate the cutting speed and adapt it to the needs of the grower.

It is a light tool that can make 12 cuts per second and allows to do the job in a fast, safe and precise way.
