# ROCK RESINATOR HEAVY YIELDS 0-7-8

Resinator is a revolutionary flower enhancer that will dramatically increase essential oil production and flower mass. Resinator provides the highest quality soluble phosphorus and potassium for translocation to flowering sites.

Using an extensive and complex combination of phosphorus and potassium designed to pack on extra size and weight to your harvest Rock Resinator ensures your favorite plants are given the best opportunity to develop to their fullest natural potential.

## How to use:

Rock Resinator is easy to use and concentrated too! For most applications, just add Rock Resinator beginning the second week of flowering through harvest at a rate of **1/2 mL per liter** of nutrient solution for a mild solution. For a stronger solution, use up to **3 mL per liter**.

*Always shake well before use.*

“ It is evident that the application of Rock Nutrients Resinator Heavy Yield 0-7-8 had a positive influence on the increased production of essential oil and resins.
